REPORT OF DAY 4

Introduction

This report summarizes the activities completed during the M-Tech Production & Marketing AI/ML Internship Program on **1 July 2026**. The session focused on introducing the Python learning roadmap and discussing the resources that will be used throughout the internship. A recommended Python playlist was shared to help interns build a strong foundation in programming before moving on to more advanced Artificial Intelligence and Machine Learning concepts.

Objectives

- Understand the Python learning roadmap for the internship.
- Become familiar with the recommended Python learning resources.
- Clarify questions related to Python programming and the internship.
- Build a strong programming foundation for future AI and ML development.

Task Description

The session primarily focused on introducing the Python learning playlist that will be followed during the internship. An interactive question-and-answer session was conducted to address interns' queries regarding Python and the learning process. The purpose was to ensure that everyone understood the learning path and had the necessary resources to begin studying Python effectively.

Work Done

During the session, I attended the introduction to the recommended Python playlist and gained an understanding of how it will support my programming journey. I actively participated in the question-and-answer session, where common doubts about Python and the internship were discussed. I also noted the learning plan and prepared to begin studying Python using the provided resources.

Challenges Faced

Since I was new to Python programming, understanding where to begin and how to approach learning the language was initially a challenge. However, the instructor addressed these concerns by explaining the learning roadmap and providing a structured Python playlist, making it easier to start learning with confidence.

Key Learnings

This session helped me understand the importance of following a structured learning path when studying Python. I learned about the resources that will be used throughout the internship and gained clarity through the interactive discussion. The session also motivated me to begin building a solid programming foundation for future Artificial Intelligence and Machine Learning projects.

Conclusion

The session served as an effective introduction to the Python learning journey during the internship. The recommended playlist and interactive discussion provided a clear direction for learning Python, while the question-and-answer session resolved initial doubts. Overall, the session prepared me to begin learning Python with confidence and consistency.
