Week 2 - Day 4 Report

Internship Program — Batch 2026

Submitted By:	Ghazi Muhammad Abdullah – AI26025
Department:	AI / ML
Submitted To:	Malik Mohazin Zahid
Date:	9 July 2026

1. Introduction

This report summarizes the activities completed during the M-Tech Production & Marketing AI/ML Internship Program on 9th July 2026. During today's session, I learned about Kaggle, one of the world's leading online platforms for Artificial Intelligence, Machine Learning, and Data Science. The session focused on understanding the purpose of Kaggle, its features, and how it can be used to access datasets, practice Machine Learning, participate in competitions, and collaborate with the global data science community.

2. Objectives

- Understand the purpose and importance of Kaggle in AI and Machine Learning.
 - Learn how to create and use a Kaggle account.
 - Explore datasets, notebooks, and competitions available on Kaggle.
 - Understand how Kaggle can be used for learning, practice, and project development.
 - Build familiarity with an online platform widely used by AI and Data Science professionals.
-

3. Task Description

The session focused on introducing Kaggle as a cloud-based platform for Machine Learning and Data Science. The objective was to understand its interface, explore its major features, and learn how datasets, notebooks, competitions, and community resources can be used to improve programming and Machine Learning skills. The session also demonstrated how Kaggle provides a practical environment for learning and implementing AI projects.

4. Work Done

During today's session, I explored the Kaggle platform and learned how it supports Machine Learning and Data Science projects. I understood how to navigate the website, browse publicly available datasets, access notebooks created by other developers, and explore Machine Learning competitions. I also learned how Kaggle can be used to practice Python programming, analyze datasets, build Machine Learning models, and share projects with the community. In addition, I explored the platform's learning resources and gained an understanding of how Kaggle can be used throughout the internship to improve practical AI and Machine Learning skills.

5. Challenges Faced

No major technical challenges were encountered during today's session. Since Kaggle was a new platform for me, understanding its interface and the wide range of available features required careful exploration. However, the session provided a clear explanation of the platform, making it easier to understand its purpose and functionality.

6. Key Learnings

Today's session introduced me to Kaggle as an essential platform for Artificial Intelligence, Machine Learning, and Data Science. I learned how to access datasets, use cloud-based

notebooks, explore competitions, and benefit from community-shared projects and learning resources. I also understood the importance of Kaggle in developing practical programming skills and building real-world Machine Learning projects.

7. Conclusion

The Kaggle session provided valuable knowledge about one of the most widely used platforms in Artificial Intelligence and Machine Learning. Exploring its features and understanding its practical applications has prepared me to use Kaggle for future learning, experimentation, and project development. The knowledge gained during today's session will support my continued growth throughout the internship and strengthen my practical experience in AI and Machine Learning.
